4,7%

Alpha-Bisabol

4,1%

Guaiol

2,4%

The percentages displayed with the terpenes indicate the ratio in which the terpenes were found in this variety.

What are cannabis terpenes?

There are over 100 terpenes, each with their own scent, flavor and medical effects. They allow unique aromas for our favorite cannabis varieties. And terpenes occur in other plants too, from tree leaves to flower petals. Fungi, algae, and bacteria also produce terpene compounds. Natural terpenes are responsible for the unique scents which give a sense of calm when breathing in the fresh fragrant morning air from a forest or when walking past some garden flowers.
